

3.2.2 Use Case Descriptions

Admin Use Cases

1. Register Account

Use Case ID: UC-AD-01 **Primary Actor:** Admin **Related Requirement:** FR-1

Preconditions:

- The user has a valid university email address.
- The user does not have an existing account.
- The user has been authorized to receive Admin privileges.

Main Flow:

1. The user opens the registration page.
2. The system displays the registration form.
3. The user enters their full name, university email, and password.
4. The system validates the entered information.
5. The system creates the user account.
6. The system assigns Admin privileges only after authorization.

Alternative Flows:

- If the university email is invalid, the system rejects registration.
- If the account already exists, the system displays an error message.
- If Admin authorization is not granted, the user does not receive Admin privileges.

Postconditions:

- A user account is created, with Admin privileges granted only when authorized.

2. Login

Use Case ID: UC-AD-02 **Primary Actor:** Admin **Related Requirement:** FR-2

Preconditions:

- The Admin has an existing authorized account.

Main Flow:

1. The Admin opens the login page.
2. The system displays the login form.
3. The Admin enters their university email and password.
4. The system validates the credentials.
5. The system verifies the user's Admin role.
6. The system redirects the Admin to the administration dashboard.

Alternative Flows:

- If the credentials are incorrect, the system displays an error message.
- If the account does not have Admin privileges, access to administrative functions is denied.

Postconditions:

- The Admin is successfully authenticated and can access authorized administrative functions.

3. Manage Profile

Use Case ID: UC-AD-03 **Primary Actor:** Admin **Related Requirement:** FR-3

Preconditions:

- The Admin is logged into the system.

Main Flow:

1. The Admin opens Profile Settings.
2. The system displays the current personal information.
3. The Admin modifies the allowed profile details.
4. The Admin selects Save.
5. The system validates and saves the changes.

Alternative Flows:

- If invalid information is entered, the system displays an error message.
- If the operation is canceled, the existing information remains unchanged.

Postconditions:

- The Admin's personal profile is successfully updated.

4. Create Club

Use Case ID: UC-AD-04 **Primary Actor:** Admin **Related Requirement:** FR-4

Preconditions:

- The Admin is logged into the system.
- The Admin has permission to manage university clubs.

Main Flow:

1. The Admin opens the Club Management section.
2. The Admin selects Create Club.
3. The system displays the club creation form.
4. The Admin enters the club name, description, and other required information.
5. The Admin selects an authorized Club Manager.
6. The system validates the entered information.
7. The system creates the new club and assigns its manager.

Alternative Flows:

- If required information is missing, the system requests the missing details.
- If the club already exists, the system displays an error message.
- If the selected manager is not eligible, the system requests another selection.

Postconditions:

- A new club is created with an assigned Club Manager.

5. Assign Club Manager

Use Case ID: UC-AD-05 **Primary Actor:** Admin **Related Requirement:** FR-4

Preconditions:

- The Admin is logged into the system.
- The selected club exists.
- An eligible Club Manager account is available.

Main Flow:

1. The Admin opens Club Management.
2. The Admin selects a club.
3. The Admin selects Assign Club Manager.
4. The system displays eligible manager accounts.
5. The Admin selects a manager.
6. The system validates the assignment.
7. The system saves the manager assignment.

Alternative Flows:

- If the selected user is not eligible, the system rejects the assignment.
- If no eligible manager is available, the system displays an appropriate message.

Postconditions:

- The selected club is associated with an authorized Club Manager.

6. Approve Event

Use Case ID: UC-AD-06 **Primary Actor:** Admin **Related Requirement:** FR-15

Preconditions:

- The Admin is logged into the system.
- An event has been submitted for approval.

Main Flow:

1. The Admin opens the Pending Events section.
2. The system displays events awaiting review.
3. The Admin selects an event.
4. The system displays the event details.
5. The Admin reviews the event information.
6. The Admin selects Approve Event.
7. The system updates the event status to Approved.
8. The system makes the approved event visible to students.

Alternative Flows:

- If the event is no longer pending, the system prevents duplicate approval.
- If the Admin cancels the operation, the event remains unchanged.

Postconditions:

- The event is approved and becomes available for students to view and register.

7. Reject Event

Use Case ID: UC-AD-07 **Primary Actor:** Admin **Related Requirement:** FR-15

Preconditions:

- The Admin is logged into the system.
- An event is awaiting administrative approval.

Main Flow:

1. The Admin opens the Pending Events section.
2. The Admin selects an event.
3. The system displays the submitted event details.
4. The Admin reviews the information.
5. The Admin selects Reject Event.
6. The Admin enters a rejection reason.
7. The system updates the event status to Rejected.
8. The system notifies the Club Manager of the decision.

Alternative Flows:

- If the Admin cancels the rejection, the event remains pending.
- If the event has already been processed, the system prevents repeated rejection.

Postconditions:

- The event is rejected and is not published to students.

8. Allocate Budget

Use Case ID: UC-AD-08 **Primary Actor:** Admin **Related Requirement:** FR-13

Preconditions:

- The Admin is logged into the system.
- The selected club exists.

Main Flow:

1. The Admin opens Club Budget Management.
2. The system displays available clubs.
3. The Admin selects a club.
4. The Admin enters the allocated budget amount.
5. The system validates the amount.
6. The system saves the budget allocation.
7. The system updates the club's available budget information.

Alternative Flows:

- If the entered amount is invalid, the system requests a valid amount.
- If the selected club does not exist, the system displays an error message.

Postconditions:

- The selected club's budget allocation is successfully recorded.

9. Generate Reports

Use Case ID: UC-AD-09 **Primary Actor:** Admin **Related Requirement:** FR-20

Preconditions:

- The Admin is logged into the system.
- The Admin has access to the required reporting information.

Main Flow:

1. The Admin opens the Reports section.
2. The system displays available report options.
3. The Admin selects the required report type.
4. The Admin specifies the reporting period.
5. The system retrieves the relevant event, attendance, or financial data.
6. The system generates the report in CSV format.
7. The Admin downloads the report.

Alternative Flows:

- If no data is available, the system displays an appropriate message.
- If report generation fails, the system displays an error message.

Postconditions:

- The requested report is generated and made available for download.

3.2.2 Use Case Descriptions

Admin Use Cases

1. Register Account

Use Case ID: UC-AD-01 **Primary Actor:** Admin **Related Requirement:** FR-1

Preconditions:

- The user has a valid university email address.
- The user does not have an existing account.
- The user has been authorized to receive Admin privileges.

Main Flow:

1. The user opens the registration page.
2. The system displays the registration form.
3. The user enters their full name, university email, and password.
4. The system validates the entered information.
5. The system creates the user account.
6. The system assigns Admin privileges only after authorization.

Alternative Flows:

- If the university email is invalid, the system rejects registration.
- If the account already exists, the system displays an error message.
- If Admin authorization is not granted, the user does not receive Admin privileges.

Postconditions:

- A user account is created, with Admin privileges granted only when authorized.

2. Login

Use Case ID: UC-AD-02 **Primary Actor:** Admin **Related Requirement:** FR-2

Preconditions:

- The Admin has an existing authorized account.

Main Flow:

1. The Admin opens the login page.
2. The system displays the login form.
3. The Admin enters their university email and password.
4. The system validates the credentials.
5. The system verifies the user's Admin role.
6. The system redirects the Admin to the administration dashboard.

Alternative Flows:

- If the credentials are incorrect, the system displays an error message.
- If the account does not have Admin privileges, access to administrative functions is denied.

Postconditions:

- The Admin is successfully authenticated and can access authorized administrative functions.

3. Manage Profile

Use Case ID: UC-AD-03 **Primary Actor:** Admin **Related Requirement:** FR-3

Preconditions:

- The Admin is logged into the system.

Main Flow:

1. The Admin opens Profile Settings.
2. The system displays the current personal information.

3. The Admin modifies the allowed profile details.
4. The Admin selects Save.
5. The system validates and saves the changes.

Alternative Flows:

- If invalid information is entered, the system displays an error message.
- If the operation is canceled, the existing information remains unchanged.

Postconditions:

- The Admin's personal profile is successfully updated.

4. Create Club

Use Case ID: UC-AD-04 **Primary Actor:** Admin **Related Requirement:** FR-4

Preconditions:

- The Admin is logged into the system.
- The Admin has permission to manage university clubs.

Main Flow:

1. The Admin opens the Club Management section.
2. The Admin selects Create Club.
3. The system displays the club creation form.
4. The Admin enters the club name, description, and other required information.
5. The Admin selects an authorized Club Manager.
6. The system validates the entered information.
7. The system creates the new club and assigns its manager.

Alternative Flows:

- If required information is missing, the system requests the missing details.
- If the club already exists, the system displays an error message.
- If the selected manager is not eligible, the system requests another selection.

Postconditions:

- A new club is created with an assigned Club Manager.

5. Assign Club Manager

Use Case ID: UC-AD-05 **Primary Actor:** Admin **Related Requirement:** FR-4

Preconditions:

- The Admin is logged into the system.
- The selected club exists.
- An eligible Club Manager account is available.

Main Flow:

1. The Admin opens Club Management.
2. The Admin selects a club.
3. The Admin selects Assign Club Manager.
4. The system displays eligible manager accounts.
5. The Admin selects a manager.
6. The system validates the assignment.
7. The system saves the manager assignment.

Alternative Flows:

- If the selected user is not eligible, the system rejects the assignment.
- If no eligible manager is available, the system displays an appropriate message.

Postconditions:

- The selected club is associated with an authorized Club Manager.

6. Approve Event

Use Case ID: UC-AD-06 **Primary Actor:** Admin **Related Requirement:** FR-15

Preconditions:

- The Admin is logged into the system.
- An event has been submitted for approval.

Main Flow:

1. The Admin opens the Pending Events section.
2. The system displays events awaiting review.
3. The Admin selects an event.
4. The system displays the event details.
5. The Admin reviews the event information.
6. The Admin selects Approve Event.
7. The system updates the event status to Approved.
8. The system makes the approved event visible to students.

Alternative Flows:

- If the event is no longer pending, the system prevents duplicate approval.
- If the Admin cancels the operation, the event remains unchanged.

Postconditions:

- The event is approved and becomes available for students to view and register.

7. Reject Event

Use Case ID: UC-AD-07 **Primary Actor:** Admin **Related Requirement:** FR-15

Preconditions:

- The Admin is logged into the system.
- An event is awaiting administrative approval.

Main Flow:

1. The Admin opens the Pending Events section.
2. The Admin selects an event.
3. The system displays the submitted event details.
4. The Admin reviews the information.
5. The Admin selects Reject Event.
6. The Admin enters a rejection reason.
7. The system updates the event status to Rejected.
8. The system notifies the Club Manager of the decision.

Alternative Flows:

- If the Admin cancels the rejection, the event remains pending.
- If the event has already been processed, the system prevents repeated rejection.

Postconditions:

- The event is rejected and is not published to students.

8. Allocate Budget

Use Case ID: UC-AD-08 **Primary Actor:** Admin **Related Requirement:** FR-13

Preconditions:

- The Admin is logged into the system.
- The selected club exists.

Main Flow:

1. The Admin opens Club Budget Management.
2. The system displays available clubs.
3. The Admin selects a club.
4. The Admin enters the allocated budget amount.
5. The system validates the amount.
6. The system saves the budget allocation.
7. The system updates the club's available budget information.

Alternative Flows:

- If the entered amount is invalid, the system requests a valid amount.
- If the selected club does not exist, the system displays an error message.

Postconditions:

- The selected club's budget allocation is successfully recorded.

9. Generate Reports

Use Case ID: UC-AD-09 **Primary Actor:** Admin **Related Requirement:** FR-20

Preconditions:

- The Admin is logged into the system.
- The Admin has access to the required reporting information.

Main Flow:

1. The Admin opens the Reports section.
2. The system displays available report options.
3. The Admin selects the required report type.
4. The Admin specifies the reporting period.
5. The system retrieves the relevant event, attendance, or financial data.
6. The system generates the report in CSV format.
7. The Admin downloads the report.

Alternative Flows:

- If no data is available, the system displays an appropriate message.
- If report generation fails, the system displays an error message.

Postconditions:

- The requested report is generated and made available for download.
